

Starmass commenced its activities about 30 years ago in the year 1984 as a specialist contract division of a private limited company. Encouraged by an overwhelming response to its highly skilled and diverse fields of activity in the year 1994- Starmass Environment Technologies Corporation was incorporated as a separate entity in USA. Starmass has since gained valuable domain experience in the core disciplines of Infrastructure, Environment and Energy. Starmass's area of focus is the interaction between Infrastructure, Environment and Energy. Thus Starmass offers turnkey solutions as : Infrastructure technologies, Environment Systems Integration, Environment Change, Built Environment, Energy Management, Waste Management and Geospatial Technologies Starmass has over time acquired the required expertise to provide customized solutions to imparting a sustained balance to areas that overlap as well as interfaces between Infrastructure, Environment and Energy. Starmass's solutions strive to maintain integrity and stability of Infrastructural elements subject to energy cycles and open to rudiments of environment.

Strength

Starmass's strength is in providing customized non-conventional solutions, which are arrived at, by an interdisciplinary approach of fields as diverse as Infrastructural sciences, Instrumentation, communication geospatial information technology with a conscious effort towards zero waste. The applications are custom developed and designed with the specifics of a project either in isolation or in combination as applicable. These technologies complements and is built upon Starmass's rich, thorough and in-depth knowledge of its decades of core areas of operations.

Turnkey

The core areas of Starmass's operations demand highly responsible solutions. Thus Starmass offers single point responsibility TURNKEY Solutions that includes investigation, monitoring, design, analysis, rehabilitation and protection of Infrastructure, Environment and Energy

Guarantees

As per International Standards, Starmass and its associates jointly issue Starmass Work Integrity guarantees for projects undertaken. A guarantee of ten years for turnkey projects successfully executed by Starmass is normal, subject contractual obligations.

We Understand the relation between Infrastructure, Energy & Environment
